“ *I was saddened to learn of the passing of Doris Glenn. I knew her throughout all her years as a colleague at Merritt Island High School and I valued her friendship and always admired her dedication to our staff and our students for those many years. She had a heart of gold and worked so well with those students who were the most challenging to reach. She believed that there was good in everyone and worked very diligently to bring out that good. There were so many kind things she did - as well as quietly supplying money from time to time to help a needy student - and she never wanted this known nor did she ever want any recognition. She was the perfect mix of being loving and being stern when dealing with students and they always knew that she believed in them and wanted the best for them. Doris, thank you for being the person and the educator that you were and I hope that you knew what a positive difference you made. Michael Ferger*
