

Ms. Leanne Susan Haas

October 20, 1948 - February 23, 2018

On Friday, February 23, 2018, a very sweet and beautiful spirit departed from this world and embarked on a new adventure for eternity, and into the loving and caring arms of her personal Lord and Savior, Jesus Christ and leaving behind, her cousin and faithful caregiver to carry on her message of hope and patience. To seek the kingdom first for their eternal life and never give up hope, that we will all be together again.

She gave of herself, 36-years of dedication and professionalism in the field of laboratory sciences, disregarding the exposures to the chemistries she was working on, Leanne would always present a complete and accurate report to the pathologist she was assigned to. She loved her job, the work and her fellow technologists in the hospital's laboratory. Leanne loved life, and volunteered herself to many charities and civic events in the city she was born and raised in. Besides her cousin she also leaves behind her beloved service cat Paris, along with numerous close friends. Mrs. Alva McHugh from Bethlehem, Pennsylvania and Mr. Anthony Tursi, from Philadelphia Pennsylvania. She would say casually that she was not going away, just relocating to a new peaceful and tranquil location. Leanne will be greatly missed, but as she was quoted saying, "we will all be together again, someday soon."

“ *I am still in shock and grieving after learning from Alva McHugh yesterday that Leanne had passed away. I am also filled with remorse for not having kept in touch with her after she moved to Florida. I remember very vividly seeing Leanne perched on front of a microscope in Heme as Ann Bachert showed me around in January 1969 on my first day as a Med Tech student. She looked so prim and proper and beautiful. Leanne and Steve became dear friends and I miss those wonderful and innocent years. Till we meet again....Michel Lloyd*

Michel Lloyd - December 15, 2019 at 05:27 AM

“ *Dear Leanne, Too soon for such a nice person to be gone. Thank you for all your help in hematology when it wasn't really my specialty. I am sorry I never got to visit with you in Florida. Rest in peace. Susan Edelman*
